Central University of Punjab

About the Topic

Pandemic has hit the economies worldwide. Indian economy is not an exception to this. Methods adopted to contain the problem of corona virus like lockdown, social distancing have seriously impacted the labour intensive informal sector, especially agriculture. The exodus of labourers during covid 19 put farmers in jeopardy and compell them to look for alternatives. Direct seeding is one of them. In this webinar our attempt is to explore the opportunities and challenges of this technique to draw the attention of all the stakeholders..

Govt. Rajindra College Bathinda

Announces Webinar
on

Adoption of Direct Seeding
Rice Technology in Punjab
midst Covid 19 :
Opportunities and Challenges

Date: June 14, 2021
Time 11:30am
